SUMMARY

Full-Stack Developer, Cloud Engineer, and DevOps practitioner pursuing a B.E. in Computer Science (CGPA 9.6) with hands-on experience in backend engineering, cloud-native applications, Docker, CI/CD, microservices, and scalable distributed systems. Built and deployed production-grade applications using React, Next.js, Node.js, PostgreSQL, MongoDB, Redis, and AWS. Co-Founded TogetherUs, a real-time virtual presence platform with **300+ organic users** and actively contribute to open-source projects.

EDUCATION

Dayananda Sagar College of Engineering, Bangalore **CGPA: 9.6**
B.E. – Computer Science and Engineering (IoT and Cyber Security) *Aug 2023 – May 2027 (Expected)*

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, Java, TypeScript
Frontend: React.js, Next.js, TypeScript, Tailwind CSS, Framer Motion, Shadcn/UI, HTML5, CSS3
Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Docker Compose, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD Pipelines, Serverless, Vercel, Firebase, Appwrite, Clerk, MongoDB Atlas, Cloudinary CDN
Infrastructure & Architecture: Linux, Microservices Architecture, API Gateway, Service Discovery, Container Orchestration, Load Balancing, Rate Limiting, Cron Jobs, Redis, Prometheus, Grafana, Cloud Infrastructure, Infrastructure as Code (IaC)
Backend & Databases: Node.js, Express.js, REST API, RESTful API Design, Socket.IO, WebSockets, MongoDB, PostgreSQL, Redis, SQL, Prisma ORM, Database Indexing, Query Optimization
Security: JWT Authentication, OAuth 2.0, RBAC, AES-256-CBC, RSA-2048, HMAC-SHA256
Tools, Platforms & Methodologies: Git, GitHub, Postman, Puppeteer, WebRTC, Mongoose, Phaser 3, Google Gemini API, Agile/Scrum, System Design, Real-Time Systems, Data Structures and Algorithms (DSA), Technical Documentation, Cross-Functional Collaboration

WORK EXPERIENCE

GirlScript Summer of Code (GSSoC) 2026 **May 2026 – Present**
Full-Stack Contributor | JavaScript, TypeScript, React, Next.js, Node.js *Remote*
– Merged **11 pull requests** across **6 production repositories**, shipping feature work (article details page, auth routing, password generator) and fixing critical bugs (OAuth redirects, signup token validation).
– Ranked **#423 globally** among **43,586 participants** (Top 1%) with **4,955 leaderboard points** across Open Source/AI tracks.

Arimart Technology Pvt. Ltd. **Jul 2025 – Dec 2025**
Full Stack Developer | Node.js, MongoDB, React.js, Express.js, Razorpay, RESTful APIs *Remote*
– Designed and deployed **18+ RESTful APIs** for inventory, cart, and order processing, achieving **zero race conditions** under high concurrent load.
– Engineered Razorpay payment integration with HMAC-SHA256 verification, eliminating **100% of duplicate charge incidents** across all transactions.
– Optimized MongoDB queries via aggregation pipelines and targeted indexing, reducing API latency by **25–30%** under concurrent load.

Open Source Contributor – Hacktoberfest 2025 **Oct 2025**
Software Developer | Git, GitHub, JavaScript, React.js *Remote*
– Delivered **6+ accepted pull requests** resolving frontend UI bugs and refactoring backend logic across multiple open-source repositories.
– Collaborated directly with maintainers from **5+ countries** via GitHub code review and contribution guidelines.

PROJECTS

TogetherUs – Real-Time Virtual Platform | [GitHub](#) | [Live Demo](#) **Mar 2026**
React.js, Node.js, WebRTC, Socket.IO, PostgreSQL, Redis, CI/CD, Phaser 3
– Co-founded a scalable real-time 2D multiplayer collaboration platform serving **300+ users** via Phaser 3 and Socket.IO with synchronized movement and live presence at **sub-100ms latency**.
– Implemented WebRTC peer-to-peer video calling with **99.8% session uptime**, backed by a Redis fault-tolerance layer and automated CI/CD pipeline.

BuildScope – AI Microservices Platform | [GitHub](#) **Feb 2026**
Docker, Docker Compose, Node.js, Express.js, Next.js, MongoDB Atlas, Firebase, API Gateway, Vercel
– Architected **6 independent microservices** orchestrated via Docker Compose with **one-command deployment**, cutting environment setup from **approx. 30 min to under 2 min** via Docker DNS service discovery.
– Built an **http-proxy-middleware** API gateway reducing inter-service response time by **approx. 40%**; deployed on Vercel with environment-scoped config and MongoDB Atlas for persistence.

SecureShare – Encrypted File Sharing System | [GitHub](#) **Nov 2025**
Docker, Docker Compose, Next.js, Node.js, MongoDB Atlas, Cloudinary CDN, AES-256, RSA-2048, JWT
– Built a production-grade file-sharing platform with end-to-end encryption (AES-256-CBC, RSA-2048, JWT) and rate limiting (25 req/15 min), featuring password-protected uploads, expiry-based links, and per-file download limits.
– Containerized via Docker Compose with zero-downtime deployment, sustaining **99.9% uptime** across **100+ transactions** and **50+ concurrent users** with **zero security incidents**.

CERTIFICATIONS

• AWS Cloud Practitioner Essentials; Cybersecurity Essentials, Python, JavaScript (Cisco); Postman API Fundamentals Student Expert; AI and ML Foundations; PwC GenAI – Prompt Engineering, Modern Data Systems, Programming Fundamentals.

ACHIEVEMENTS

• **Co-founded** TogetherUs – real-time virtual presence startup with **300+ organic users** within weeks of launch; actively scaling features and user base.

• **DSA:** Solved **700+ LeetCode problems**; global rank **35,130** out of millions of active users.
